Dental Implants & Crowns

Walking around Philadelphia with missing teeth? Grow new teeth by using dental implants and crowns!

You can replace one, several or all of your missing teeth. With success rates higher than 95%, it makes sense to restore your smile with long lasting dental implants. Schedule your dental implant consultation to find out more.

Implant Supported Dentures

Attention denture sufferers. Is your lower denture swimming around your mouth while you try to chew? Is the full coverage palate in your top denture taking up too much space, gagging you and ruining the taste of food?

Dental implants may be solution. Stop in to find out how dental implants can help you enjoy your smile again.

Porcelain Veneers

Are your teeth stained, chipped and unattractive? Do you want a Hollywood smile that others envy? Porcelain veneers may be the solution you are looking for.

Conservative preparation that removes just ½ mm of enamel does little harm to your teeth. But the difference it makes in your appearance is stunning. Your new smile will add confidence and change your life for the better.

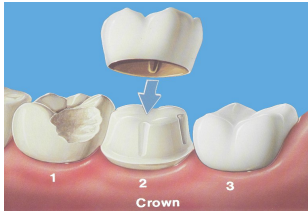

Dental Bonding

Need a dental filling? have a small chip on your front tooth? Want to replace an old ugly leaking silver filling? You've come to the right place.

Dental bonding has made it possible to bond tooth colored material to your teeth. This means that no one will be able to tell when you have a filling or a small fix. Come in for a dental consultation to see if dental bonding can improve your smile.

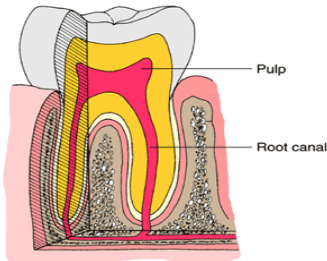

Dental crowns

Broken tooth? Old crown with ugly black line on the bottom? Had a root canal on a back tooth recently?

These may be indications for a dental crown. A beautiful dental crown or onlay made by a reputable U.S. laboratory can restore your mouth to its natural beauty. Schedule a dental crown consultation to find out your options.

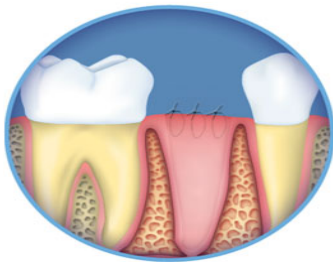

Root Canals

Does your tooth hurt? Has a small cavity become too deep or caused your tooth to fracture?

By performing root canal therapy, a tooth can be saved. Innovations in technology have given us the ability to perform root canal therapy PAINLESSLY, quickly and predictably. If you are in pain, call us right away so that we can schedule you an emergency appointment.

Dental Extraction

Is your tooth completely broken down? Is an erupted wisdom tooth causing you pain? Dental extraction may be necessary.

With modern day anesthetics, the whole process is simple, quick and painless. Best of all, we can often place a dental implant the same day as the extraction to instantly get you back on track for replacing the tooth. Schedule a consultation to find out if this treatment is right for you.

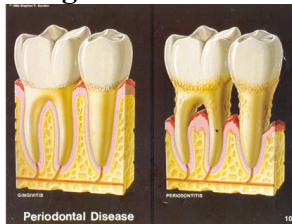

Children's Dentistry

Has your child had his/her first tooth? It's time to visit the dentist!

We love to treat children and help them to develop habits that will serve them for the rest of their life. Bring your child or infant in for their first dental exam, cleaning and checkup - we make it fun so that your child will actually look forward to visiting the dentist.

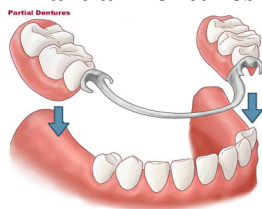

Scaling and Root Planing

Bleeding gums, heavy calculus, and bad breath may be signs of periodontal disease. Something you should get under control.

To treat gum disease, we offer scaling and root planing or deep cleanings. The procedure is completely comfortable and your gums will heal beautifully within a few weeks. Schedule an appointment to find out what we can do to improve the health of your gums.

Partial Dentures

Have you lost several back or front teeth? Are dental implants out of your budget? Do you want to be able to chew normally again?

Quality partial dentures can replace multiple teeth so that you can chew better and regain a beautiful smile. It is the affordable solution to tooth replacement. Schedule your partial denture consultation today!

Complete Dentures

Do you have an old set of complete dentures that don't fit or feel like they used to? If it's been more than 5 years since your last set was made, it is probably time for new dentures.

With over 30 years of experience in Dentures and reputable U.S. based dental laboratories on your side, you can rest assured that your complete dentures will turn out great. Schedule your complete denture consultation to find out more.

Cleaning and Checkup

Has 6 months passed since your last cleaning and checkup? Are you getting nervous about your oral health?

Calm your worries and get a mouth that feels fresh and clean. Your 30 minute cleaning and checkup will give you peace of mind and ensure life long oral health. Call to schedule your appointment and be on the way to great health. Are you a new patient? Ask about our new patient special.

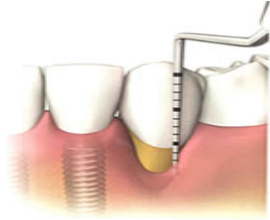

Tooth Whitening

Have those chompers lost their sparkle? Renew your smile with tooth whitening that strengthens your teeth at the same time.

Today's tooth whitening formulas are more powerful and gentle on your teeth giving you a whiter smile more quickly and actually strengthening your teeth in the process with fluoride. Schedule your tooth whitening consultation to find out if tooth whitening can help refresh your smile and improve the way you look and feel.

Periodontal Surgery

Have you undergone several deep cleanings with no change in your gum disease? Periodontal surgery may be the answer.

This treatment can help to more carefully remove plaque and calculus that is harboring bacteria and causing your periodontal disease to go unchecked. Gain the upper hand in the fight against periodontitis. Schedule a perio surgery consultation to find out more.

Invisalign and Braces

Are your teeth spaced apart? Are they crowded? Do you want to fix your smile?

Braces or invisalign can fix small imperfections in your smile. We can move your teeth and create a beautiful smile that you can be proud of. Schedule your orthodontic consultation to find out how braces or invisalign can improve your smile by straightening your teeth.

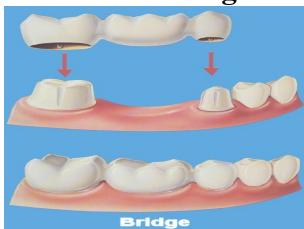

Full Mouth Reconstruction

Is your mouth causing you pain? Are you missing all or most of your teeth? Do you have large bridges that are failing?

A full mouth reconstruction can give you back your ability to eat and smile. If you would like to see how to get a second chance at an amazing smile, call our practice and schedule your consultation.

Dental Bridge

Do you have moderate spacing but implants are out of budget or difficult with your medical history? A dental bridge may help fix the problem.

Dental bridges can be made to beautifully match your natural teeth. In most cases, we can fill the space of the missing tooth in just 2 weeks. Come in to find out if a dental bridge is a good option to replace missing teeth.

Dental Onlay

Porcelain onlay

Has a large filling in your tooth caused your tooth to fracture? Is there an old ugly silver filling causing cracks in your tooth?

A dental onlay can help to replace the old filling and support your weakened tooth. Schedule an appointment to find out if a dental onlay can help you save a vulnerable tooth and restore your beautiful smile.

Cosmetic Dentistry

If you had a magic wand that could change anything in your smile, would you use it?

We can help make dramatic adjustments to your appearance by improving the look and feel of your smile. If you would like a beautiful hollywood smile you can be proud of, we are happy to show you exactly how it can be done. Schedule your cosmetic dentistry consultation to find out how we can help you achieve your dream smile.

Snap On Smile

Have you ever wondered what your smile could look like? Now you can have a laboratory technician craft you a beautiful custom smile that you can wear whenever you want.

There is no drilling and no shots. Just one mold impression. Schedule a Snap On Smile consultation today to find out more.

Athletic Mouthguard

Do you or your children play sports?

It is a good idea to get a custom athletic mouthguard to protect your teeth. A custom mouthguard fits perfectly over your teeth and protects them against fracture or trauma. Schedule an appointment to make your mouthguard!

Dental Night Guard

Do you wake up with pain in your cheeks in the morning? Do you suffer from bruxism or grinding? A custom dental nightguard may help.

A soft material inside and a hard material outside makes it both comfortable and durable. The result is something that fits comfortably in your mouth and protects your teeth and jaw from further damage that you cause while you're asleep.
